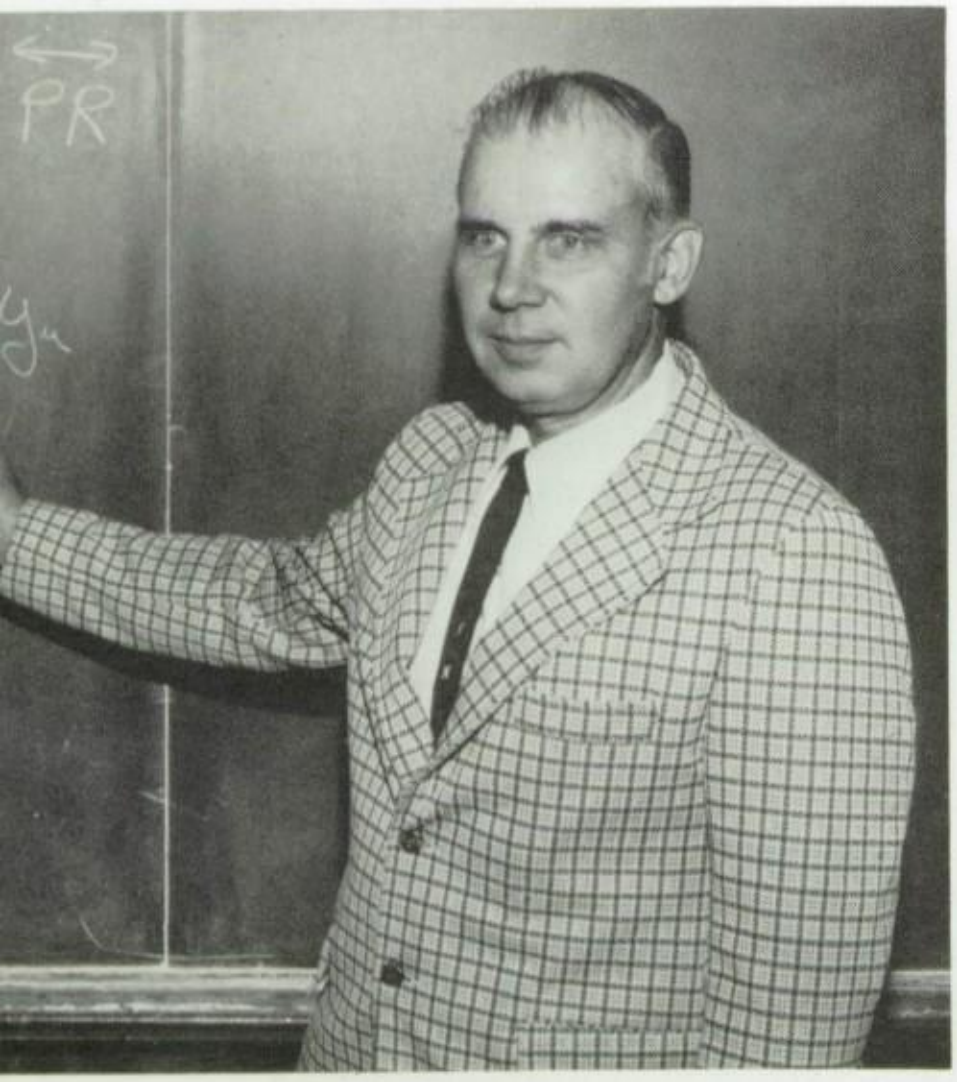
PRESENTS

"THE BEST OF TIMES"



Mr. Cembalski,

We would like to make a special dedication to you in return for all of the patience, help, and support you have given us through the years. We truly couldn't have made it through them without you.

To you we dedicate the best years of our lives as we remember them in the following pages.

Class of '82

Mr. Dreimiller.

As we look through this book of memories in years to come, we will remember you for all the tremendous help, time, and friendship you gave us. These three important elements are essential in order to create a book like this one. Thanks to you, we were able to do it.

We hope that when you look back on this year, you will agree that these were indeed "The Best of Times"

IN MEMORY OF

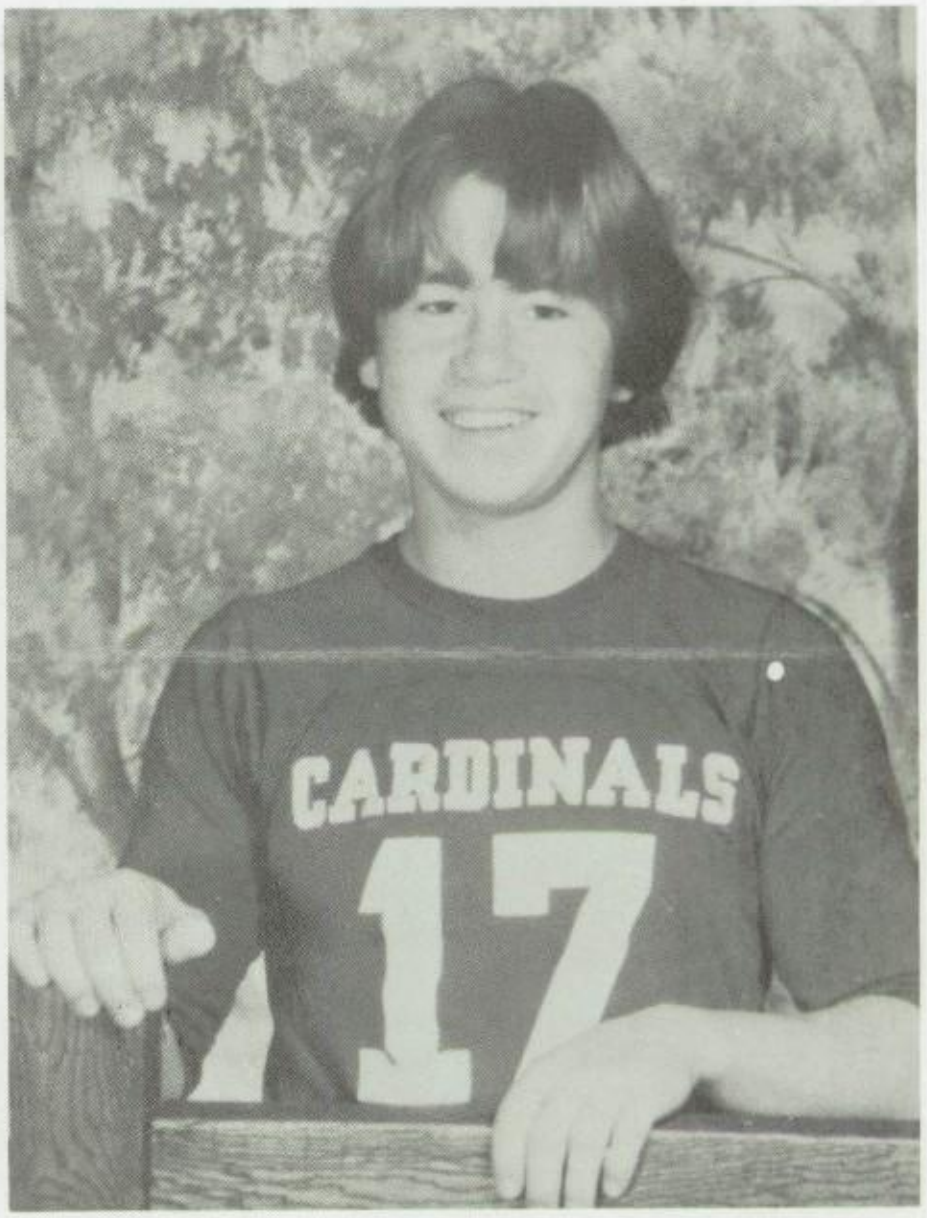
"Rusty" Ryan

If we could save time in a bottle,
The first thing that we'd like to do
Is to save every day like a treasure, and
then
Again we would spend them with you.

If we could make days last forever,
If words could make wishes come true,
We'd spend every day till eternity passes
away
Just to spend them with you.

If we had a box just for wishes,

Walt Porter



And dreams that had never come true,
The box would be empty except
For the memories of how we have
Spent them with you.

But there never seems to be enough time,
And the times we spent with you are too
few,
But one last thing that we'd like to say
Is, Rusty and Walt, we do, and we will
always miss you.

AMERICAN FIELD SERVICE

When I first came to Ticonderoga in July, I must admit I was pretty confused. I mean, not only were the cars driving on the wrong side of the road, but, of all things, even the light switches were back to front. I have managed to conquer the problem of the light switches without too much trouble, but crossing the road is quite another matter — I always seem to look the wrong way for oncoming traffic.

Coming here for twelve months as an AFS exchange student has meant dealing with a lot of changes, but it has also been a very rewarding experience — one I wouldn't have given up for the world. The change from a big city to a small town is probably the hardest thing to get used to at first. Ticonderoga, with a population of 5,000 is nothing at all like Melbourne, my home in Australia, which has close to 3 ½ million people. But I have found that the people in Ti have been so nice and friendly towards me that the differences have seemed a lot smaller. Another difference I have come across is that of the seasons. I mean, I have always had a winter birthday before because it is in August; but when I came here, a lot of people looked at me strangely when I said that. So I was really looking forward to the prospect of having my first summer birthday; and what does it go and do?! It rains!!

The only thing I have come across that I don't like about being away from home is the number of letters I have to write. I know for a fact that Mr. Dreimiller realizes how much I hate writing letters because it took months of nagging from him before I finally got this written. I have probably written more letters in this one year than I have ever or will ever write in my life.

When everyone heard that I had never seen snow before, they were really surprised — they just couldn't believe it. I think that snow is pretty for a while, but after a few months of it, I feel I am ready for summer again — even though it has given me an opportunity to learn to ski.

Being at Ti High has given me the chance to do many things I have never done before. Cheerleading is one of these. I had only seen cheerleaders in the movies, so it was quite a new experience for me. It also gave me an opportunity to learn the rules of American football. I now at least know what the purpose of the game is. Ti High has also shown me how to really get into the school spirit. It is a great school with terrific people in it and I know that even when I go home, I shall be cheering for the Ticonderoga Sentinels. They will always be number one on my list.

And finally, for all the people who said they would love to have my Australian accent: I would gladly leave it for them if I could, in an attempt to thank them for all they have done for me during this past year. Really, it has been the people that have made my year such a terrific one — especially the Spragues who made me feel welcome and a part of the family, and my parents who let me come here for a year. To me, Ti will always be my home in the United States. I only hope that when I come back here some day, not everyone has forgotten me because I know I will never forget Ti.

P.S. No, I do **not** have a pet Kangaroo!!!

Sure, I'd love to report to the office!"

How to enjoy the classics

By Steve Allen

International Paper asked Steve Allen, television comedian, composer, writer of the television series "Meeting of Minds," author of 22 books and lover of the classics, to tell how you can appreciate man's greatest written works.

Why is it? In school we learn one of the most amazing and difficult feats man has ever accomplished – *how to read* – and at the same time we learn to hate to read the things worth reading most!

It's happened to us all – with assignment reading! It happened to me. The teacher assigned *Moby Dick*. I didn't want to read it. So I fought it. I disliked it. I thought I won.

But I lost. My struggle to keep at arm's length from *Moby Dick* cost me all the good things that can come from learning to come to terms with those special few books we call the "classics."

I've come back to *Moby Dick* on my own since. I *like* it. And I've discovered a new level of pleasure from it with each reading.

What *is* a classic? A classic is a book that gives you that exhilarating feeling, if only for a moment, that you've finally uncovered part of the meaning of life.

A classic is a book that's stood the test of time, a book that men and women all over the world keep reaching for throughout the ages for its special enlightenment.

Not many books can survive such a test. Considering all the volumes that have been produced since man first put chisel to stone, classics account for an infinitesimal share of the total – less than .001 percent. That's just a few thousand books. Of those, under 100 make up the solid core.

Why should you tackle the classics? Why try to enjoy them?

I suggest three good reasons:

1. Classics open up your mind.
2. Classics help you grow.
3. Classics help you understand your life, your world, yourself.

That last one is the big one. A classic can give you insights into yourself that you will get nowhere else. Sure, you can get pleasure out of almost any book. But a classic, once you penetrate it, lifts you up *high*! Aeschylus's *Oresteia* was written nearly 2,500 years ago – and it still knocks me out!

But I can hear you saying, "I've *tried* reading classics. They are hard to understand. I can't get into them."

Let me offer some suggestions that will help you open up this wondrous world. Pick up a classic you've always promised to try. Then take Dr. Allen's advice.

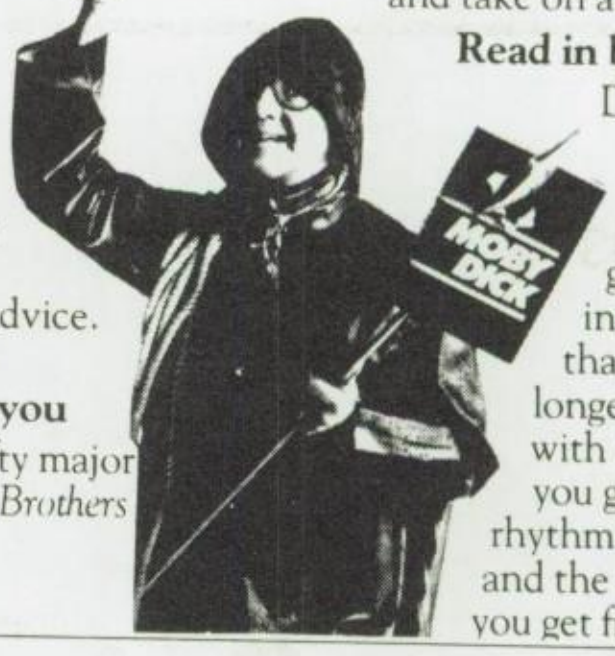
Don't let a lot of characters throw you

Dostoevsky tosses fifty major characters at you in *The Brothers Karamazov*. In the very first chapter of *War and Peace*, Tolstoy bombards you with twenty-two names – long, complicated ones like Anna Pavlovna Scherer, Anatole and Prince Bolkonski. Don't scurry for cover. Stick with it. The characters will gradually sort themselves out and you'll feel as comfortable with them as you do with your own dear friends who were strangers, too, when you met them.

Give the author a chance

Don't say "I don't get it!" too soon. Keep reading right to the end.

Sometimes, though, you may not be ready for the book you're trying to get into. I tackled Plato's *Republic* three times before it finally opened up to me. And man, was it worth it! So if you really can't make a go of the book in your lap, put it aside for another day, or year, and take on another one.



Read in big bites

Don't read in short nibbles. How can you expect to get your head into anything that way? The longer you stay with it, the more you get into the rhythm and mood – and the more pleasure you get from it.

Years ago, International Paper sponsored a series of advertisements, "Send me a man who reads," to help make Americans more aware of the value of reading.

Today, the printed word is more vital than ever. Now there is more need than ever before for all of us to *read* better, *write* better, and *communicate* better. International Paper offers this *new* series in the hope that, even in a small way, we can help.

Tammie, "Sis"

We'll I only have two more years of school. I'll always remember all of our talks. You were always there when I needed to talk, I would always appreciate that. I never thought we would become really super close friends, but we did. You are a sister to me! Thank you for sharing your problems with me, trusting me enough. We have a lot of time in the future to take advantage of and I know I will. Like you always said, I am still young and now I have my life in somewhat order. Without your talks I don't know where I would be. You are a very special person, and no matter what happens our friendship will never change. I could write more but I'm running out of room.

Tam, take best of care of yourself and keep on keeping your do.

Love,

Susan
"Sis"
